

## SMART MAGNETIC PAINT

To apply Smart Magnetic Paint correctly, please follow the instructions below.

### 1

### MEASURE YOUR AREA

Measure the area accurately, ensuring you have enough paint.

### 2

### PREPARE THE SURFACE

Check and fill any holes or cracks in the surface with a normal decorator's filler. Once the filler is dry, sand the surface to ensure it is smooth and remove any dust.

### 3

### APPLY THE MAGNETIC PAINT

- We recommend 3 coats of Smart Magnetic Paint. You can apply extra coats to increase the magnetic performance (no more than 7)
- Stir the magnetic paint before use
- Apply a generous even coat of Smart Magnetic Paint to the surface leaving a smooth finish
- Once the first coat is dry (after approx. 2 hours), lightly sand the surface with 1200 grade sandpaper
- Remove any surface dust with a dry brush or cloth
- Apply a generous even second coat of Smart Magnetic Paint. Allow to dry and sand lightly
- Repeat the process until you have applied your desired number of coats

**Top tip:**

You can add a final layer of magnetic paint by using a straight metal edge to skim the product across the top of the surface to create a highly smooth finish.

### 4

### MAGNETS

Use Smart Neo-Magnets or other neodymium magnets with your Smarter Surface.

**Note:**

Ordinary household magnets are not suitable.

Additional finishing options for your magnetic surface:

| Dry Erase                                                                                                                  | Wet Erase                                                                                     | Colour of your choice                                                                                                                                                       |
|----------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Add dry erase functionality to your magnetic surface by choosing Smart Wall Paint (dry erase paint) or Smart Wallcovering. | To add wet erase functionality to your magnetic surface, apply Smart Blackboard Paint on top. | Simply pick a colour of your choice and apply on the top of your magnetic surface. In addition, you can add a coat of Smart Wall Paint Clear for a dry erase functionality. |

These products and more are available from your local Smarter Surfaces partner or [www.smartersurfaces.com](http://www.smartersurfaces.com).
